bessarabov commented on **nellb**'s quest [Write a review of perl web frameworks:](#)

There is also framework called [Jifty](#), but it was last updated in 2011, so I'm not sure if it is worth mentioning.

zmughal commented on **zmughal**'s quest [Look for a module that uses GNU units' units.dat. If there isn't one, build one.:](#)

Integrating this with a module that can handle units in programmatically would be nice. This can be used to say, generate tables in LaTeX that use the siunitx package or create graphs that deal with physical quantities.

The screenshot shows a Coursera course page for "Gamification". On the left is a sidebar with navigation links: Home, Syllabus, Video Lectures, Homework Quizzes, Written Assignments, Final Exam, Discussion Forums, Gamification Wiki, Course Policies, Course Wiki, and Join a Meetup. The main content area features a video player at the bottom displaying a video titled "1.3 Definition of Gamification (12:32)" with playback controls. Above the video is a gamification dashboard. It includes sections for "My Goals & Challenges" (with 1 Medals and 1 Trophies), "My Farthest Run" (4.01 mi), "My Fastest Runs" (times for 1 MI, 5K, and 10K), and a "2010" summary card from Nike+ encouraging users to run even better in 2011. A video thumbnail of Kevin Werbach speaking is also present. The top right corner shows the user profile of Chris Richards.

В 1.5 раза больше, чем на rt.sran.org

David Mertens: “play-perl was only just announced, but I've already fallen in love with it.”

zmughal:“Play Perl is a game changer.”

Yanick Champoux:
“So, this morning I finally clicked on one
of the tweets talking about that new Play
Perl thingy. And then I squealed like a
little girl.”
